EDUCATION

Bachelor of Science in Civil Engineering
Dedan Kimathi University of Technology | 2025

SKILLS

- Structural Design
- Concrete Design
- Bridge Analysis
- Finite Elements
- Construction Supervision
- Site Inspection
- Material Testing
- Drafting Skills
- Building Codes
- Cost Estimation
- Load Analysis
- Reinforcement Detailing
- CAD Drafting
- Project Reporting
- Structural Modelling
- Construction Safety
- Design Analysis
- Quantity Assessment
- Technical Documentation
- Survey Support
- Quality Control
- Batching Operations
- Structural Calculations
- Workflow Coordination
- Engineering Standards Compliance

LANGUAGES

- **English - Fluent**
- **Swahili - Native**
- **German - Intermediate**

EXECUTIVE PROFILE

Civil & Structural Engineer with 2+ years' experience in structural analysis, reinforced concrete design and construction supervision across educational and commercial projects. Supported facility blocks and concrete production, ensuring quality and safety. Proficient in MIDAS Civil, AutoCAD Civil, and RCC design tools, delivering accurate structural layouts and documentation. Strengths in batching plant operations, field inspections, material compliance and engineering codes. Currently enhancing remote administrative and digital coordination skills through ALX Virtual Assistant training for distributed engineering teams. Gained supervisory capabilities via leadership training. Adept at collaborating in hybrid/remote teams to strengthen coordination, accelerate decisions and ensure on-time project execution. Seeking to deliver structural engineering excellence and innovative problem-solving within a dynamic organization committed to impactful infrastructure development.

WORK EXPERIENCE

Graduate Engineering Trainee | State Department of Housing and Urban Development | Kiambu, Kenya | Dec 2025 – Present

Key Responsibilities:

- Supported construction phase verification activities to strengthen alignment between approved drawings and on-site execution.
- Conducted field monitoring and inspection reporting to improve traceability of compliance across key construction stages.
- Prepared regulatory documentation support submissions, strengthening review readiness and reducing approval delays.
- Coordinated updates across stakeholders using structured communication workflows to maintain clarity on site issues and actions.

Structural Engineering Attachée | Meijer Engineers Ltd. | Nairobi, Kenya | Feb 2025 – Apr 2025

Key Responsibilities:

- Applied Structural Design principles and MIDAS Civil modeling to design reinforced concrete beams and slabs, improving strength compliance for multi-storey developments.
- Developed precise CAD Drafting layouts in AutoCAD Civil to optimize reinforcement fixing and reduce construction rework.
- Executed Load Analysis and structural checks using RCC sheets aligned to Eurocodes and Kenyan Standards to ensure safety margins were achieved.
- Collaborated through digital coordination tools to streamline multidisciplinary approvals and accelerate design finalization.
- Conducted Construction Supervision inspections of shuttering, reinforcement placement, and concrete works to ensure on-site adherence to drawings.
- Updated technical documentation using Project Reporting standards to enhance traceability and consultant review workflows.
- Evaluated material suitability through Quality Control measures to ensure structural reliability and conformity to design specifications.

Batching Operations Trainee | Onda Construction Company | Nairobi, Kenya | Jan 2025 – Feb 2025

Key Responsibilities:

- Conducted Batching Operations using calibrated mix ratios to enhance reliability and structural performance of ready-mix concrete.
- Tracked production logs in MS Excel to support Quantity Assessment and improve batch consistency across daily operations.
- Inspected aggregate and cement feeding for Quality Control alignment with mix design standards.
- Recorded stock movement to maintain Cost Estimation accuracy and reduce excess raw material use.
- Participated in digital shift planning to improve Workflow Coordination between batching plants and on-site delivery teams.

Attachee Civil Engineer | Technical University Of Kenya | Nairobi, Kenya | May 2023 – Aug 2023

Key Responsibilities:

- Utilized Structural Modeling and reinforcement detailing to support design execution of two educational blocks, improving project planning accuracy.
- Performed Site Inspection and monitoring of construction phases including masonry, curing, and slab casting to align activities with engineering drawings.
- Prepared comprehensive inspection reports and Technical Documentation submissions to strengthen regulatory compliance.
- Supported Survey Support tasks such as leveling and setting-out to enhance structural placement accuracy for load-bearing elements.
- Leveraged hybrid collaboration platforms to improve coordination and Workflow Management with faculty and project teams.
- Analyzed concrete and steel laboratory results to reinforce Material Testing quality requirements for durability and loading performance.
- Assisted scheduling and Construction Safety checks to minimize delays and mitigate risks during field operations.

CERTIFICATION

- **Virtual Assistant |** ALX Africa | 2025

LEADERSHIP

- **Leadership training programme |** Kenya School of Government | 2025

TOOLS

MIDAS Civil, AutoCAD Civil, RCC Sheets, MS Excel, Google Workspace, MS Teams, BIM Tools.
